My left hand is clicking, my right hand however..... Uninspired fetch quests, a gimmicky concept ("ooh, we're playing the game out of order"), braindead battle difficulties, and immature characters. If you want to watch every anime ever made and play every JRPG in existence, you might enjoy this. I am picky and did not.. It's hard to think of something creative or insightful to say about this game. There aren't really any hidden depths; it's a game where you click and drag to kill things while avoiding actual contact with them. What you see is what you get. Even for \$5, it just doesn't seem as interesting as other free games I've played. In just 20 minutes, I feel like I've already seen all the game has to offer. Some interesting achievements might have gone a little further in expanding the concept, or maybe some more powerups and upgrades.

As it stands, it's just a little arcade game. Perhaps a good mindless game to unwind and abnegate with, but not great for extended play sessions. The frustrating difficulty (not to mention the game taunting you if you play poorly enough) and lack of depth make it get old fast.. I'm a sucker for Platform games and I love the style of this one...looks great and plays very well too! Nicely done...!!!. If at first you don't succeed: Try, try, and try again.

I did.

I tried to play Sea Legends three times. And I still don't like it. I would have loved to like it, because there is so much to like.

The story is somewhat ok \u2013 the standard hocus-pocus for HOGs: Shipwreck, abduction, rescue and whole lot of occult. Actually just standard for HOG and therefore ok.

But it is an old game, and that is the problem. There are a big lot of really good and challenging hidden object scenes (remember: the graphics are old \u2013 but you can find the items).

All in all, it could be an ok game, but I really, really, REALLY do miss a better hint button, than \u201cThere is nothing to do here\u201d.

What?

Say what?

\u201cThere is nothing to do here?\u201d

Well. Thanks for nothing!

There is no map, and on your way through the game you forget the story and the places to do something.

Because: \u201cThere is nothing to do here\u201d

Not that there are so many places to go \u2026

I have tried to complete the game three times now, but never succeeded because I got bored and frustrated.

Sorry: It does have great deal of good HOS but the rest is not worth it.

This is a good, simple and short game. Nice graphical style, nice sound design. I played it again recently and noticed that controller support is much improved, so that the entire game is now playable with the controller.. you pick a dog, put clothes on it, take a picture and play one frisbee game... then start over.. boring. even my 4 yr old was like.... "why cant i feed or give dog a bath? THIS ISNT MY DREAM DOG!". nice price for a great game seriously

you build a base and explore for unlock new recipes weapons and skills like a good rpg, the people say the gameplay of the fights aren't so great but for me its really good

100 % recommended. A very enjoyable point & click game. I'm a big fan of the Cube Escape series, so I thought I would like Rusty Lake, I was correct.

Very grim with many secrets. Totally recommended.. a bit annoying but a good looking game with a nice music. i love harley she reminds me of my crazy little nieace i call her pooper haha. It was an alright game, but I didn't find myself enjoying it much. The story felt lackluster, and I probably won't play through it again any time soon. Pick it up if you want a small, decent platformer, but wait until there's a sale.. *Yet another Dharker game*

This one's pretty good as far as the genre goes, the genre being simple-ish short VNs. There's a ton of choices, plenty of routes, R18 patch available (if that's your thing) and it's well made as far as the background and character art goes.

The story isn't going to blow you away, but at least the setting is interesting.
